Ivy Tech University
Muncie, Indiana

Amended the funding to the following agency project:

1. War Memorial Commission (315) \$250,000
Roof and Plaster Repair

The Indiana War Memorial is requesting funds to make repairs to the Shrine Room roof and historic plaster frieze. The plaster frieze on the south wall has sustained water damage along with the wall above the frieze due to a drainage issue from the roof. The water infiltration has been linked to a leaking roof drain assembly; during heavy rains this drain fails and water runs down the south wall of the shrine room. War Memorial will ensure the leaking roof drain assembly has been fixed before proceeding with the plaster repairs.

Funding: 2013 GF Conservation & Environmental Construction
